ABOUT ME

It was during my schooling for Geographic Information Systems that I discovered my true passion for coding. Taking classes such as GIS Programming, which used Python, and CS courses that taught Java, I found the subject that I knew I wanted to pursue as my career. Post-graduation, I have delved fully into the world of coding and software development. Coding is not something I look at as just a job, but a chance to create and perform fulfilling and challenging tasks. Below are my projects that will showcase my skills and knowledge of software development.

EXPERIENCE

E-commerce Site app

This application emulates a real-world e-commerce site and was built using C#, ASP.NET MVC, and a SQL database. This application taught me how to combine C#, HTML, CSS, Bootstrap, and SQL into a full-stack web application.

Winery Landing Page app

This application focuses on front-end styling for a display page for a business, rendering necessary information for visiters to the site in an astethic layout. Here I learned how to implement many CSS features, such as flexbox, grids, and media queries.

Weather Finder app

This application displays current weather conditions for any city in the world. This application utilizes a custom interactive map, CSS, vanilla JavaScript, and AJAX to get weather data from the DarkSky.net API.

Portfolio Site app

This ReactJS application was built to host my projects in a consolidated portfolio. Here I learned how to use React and React Router, including the interplay of components, state management, and props.

EDUCATION

Geography, B.A.	California State Univeristy, Long Beach	Concentration in Spatial Science and Geographic Information Systems	January 2017 - May 2019
Geography AA-T and Natural Sciences AS	Sierra College	Concentration in Geographic Information Systems	August 2013 - December 2016

EMPLOYMENT

Flexible Fufillment Team Member	**Store Clerk**	**Flow Team Member**
Target Corporation	Yogurt Time Cafe	Target Corporation
Seal Beach, CA	Antelope, CA	Roseville, CA
October 2017 - Current	August 2013 - January 2017	July 2011 - August 2012
